How the FRIO® works

Sizes and Colors

Benefits to your customers
A reusable evaporative cooler…
Most drugs are recommended to be stored at what's known as "controlled room temperature".

MEDICATIONS THAT ARE TEMPERATURE SENSITIVE CAN NOT GO OVER 86 F
Exposure to heat could threaten effectiveness of certain medications

INSULIN    BYETTA
VICTOZA    BYDUREON
EPI-PENS    THYROID MEDS
MS MEDS    TOPICAL MEDS
...and many others

An issue for tens of millions of Americans
FRIO Cooling Cases keep medication at, or below, room temperature (77-78°F) for up to 2 days in temperatures of 100°F.
Then simply reactivate it by soaking it again and you are good for another 2 days, over and over again...
Sizes and colors to meet every need and preference…
