• How the FRIO® works
• Sizes and Colors
• Benefits
FRÍO® Cooling Cases are evaporative coolers that keep medication at or below room temperature (77-78F) for up to two days in temperatures of 100F.

IT’S ALSO REUSABLE!
To activate the FRÍO®, soak it in cold water for 5-15 minutes.

To use it again, put the FRIO® back in water. It can be reactivated over and over again!
In addition to insulin, the FRIO® can also be used for other medications*:

- Byetta
- Bydureon
- Victoza
- Anaphylactic shock therapies
- Glaucoma eye drops
- and many others...

*Please check your medication’s storage requirement to see if it is suitable for the FRIO®
The FRIO® is designed to suit all types and makes of insulin pumps, insulin pens, insulin vials and standard refill cartridges.

In six beautiful colors!
• Mini – 1 vial (w/syringe)
